

KISHAN KUMAR MAHARANA

Laravel Developer (PHP)

7978688223 | kishankumar070997@gmail.com | LinkedIn: kishanmaharana

ABOUT ME:

Experienced Laravel Developer with 6+ years of expertise in API development, optimization, and integration. Skilled in MVC architecture, database optimization, and cloud services. Worked on diverse domains, including workforce management, AI-based apps, and content management, collaborating with international clients to build scalable, high-performance applications.

WORK EXPERIENCE:

Rishabh Software

Software Engineer | 09 April, 2025 - Present

- Developed and enhanced scalable RESTful APIs while resolving critical server-side issues and performance bottlenecks.
- Extended and optimized Kafka-based services to meet evolving business and data processing requirements.
- Built and maintained backend systems using Laravel and PostgreSQL for high-performance applications.
- Improved automated test coverage from 20% to over 75%, ensuring higher code quality and stability.
- Actively participated in code reviews and contributed to maintaining high development standards.
- Worked closely with team members to analyze requirements and implement efficient backend solutions.
- Contributed to an AdTech platform focusing on data-driven performance and system efficiency.

Codebuddy Private Limited

Software Developer | 09 October, 2023 - 1 April 2025

- Developing and optimizing REST APIs, UI components, and full-stack features for various applications.
- Implemented **ElasticSearch** to efficiently search and manage over **1M+** records.
- Integrated AI tools like ChatGPT and Gemini into projects for automation and enhanced user experiences.
- Implemented Websockets, Laravel Event Listeners and Job Queues to handle asynchronous processes efficiently.
- Closely worked with international client-side teams to develop highly scalable applications.
- Experience in Docker, server-level debugging, and optimizing application performance.
- Implemented various Laravel packages like Telescope, Scout, Nova, Pulse, Socialite, and Passport to enhance application functionality.
- Implemented automation tools like Zapier and Buildship.io to streamline workflows.
- Integrated third-party services like Rev API, ClickUp, EmbedRock, Google Drive, YouTube API, and Zoom API to extend application capabilities.

Valuecoders

Software Developer | 01 January, 2020 - 29 September, 2023

- Developing APIs for the WorkStatus product (workforce management system).
- Developing new APIs and redesigning existing APIs to improve product quality with experience working on the base product as well as the admin panel.
- Integrated Stripe payment gateway to manage smooth payment processing for users.
- Amazon AWS S3 integration for required services to decrease server load.
- Expertise in developing and designing Laravel REST APIs.
- Increased the product's speed and efficiency by **25%** by implementing REDIS service.
- Experience with service-repository patterns for smooth business logic implementation.

Projects

Workstatus (Time Tracking & Employee Monitoring Tool)

- Developed scalable APIs for real-time analytics and automated reporting, ensuring efficient workforce management. Focused on optimizing system performance and reliability to meet business needs.

Membership.io (Automated Content Management Platform)

- Designed and optimized backend APIs, improved existing services, and integrated third-party tools. Worked closely with client-side developers to implement scalable features for seamless content management.

HiringDay (Resume & Cover Letter Assistance Platform)

- Developed a full-stack solution in Laravel, allowing users to either upload their resume/CV or provide personal and professional details to generate expert-crafted resumes and cover letters. Designed and implemented both frontend and backend functionalities for seamless user experience.

XactiMatch (Insurance Claim Document Matching System)

- Developed a Laravel-based system to compare insurance claim documents, identifying missing details, similarities, and discrepancies. Implemented data scraping, mapping, and automated report generation. Designed and built both frontend and backend solutions, along with a fully customized admin panel for seamless management.

Mpact International ((LMS) for managing courses, learning content, and custom surveys)

- Developed frontend with Vue.js and backend with Laravel, implemented features like Assessment, Surveys, Employee management, Subscription management, and fixed existing bugs.

Brizzle Store (E-commerce Platform)

- A feature-rich e-commerce platform similar to Amazon & Flipkart, offering secure transactions and seamless user experience. Responsible for developing new features, troubleshooting bugs, and ensuring platform security for smooth operations.

SKILLS:

- Backend Development | Full Stack Development | Web Development
- API designing and development in Laravel with experience of working with MySQL.
- CI/CD, Git, SonarQube, XAMPP, Zoho, Asana, Clickup, JIRA, .
- Server tools like Apache, Nginx (1 year), MySQL, Supervisor, Jenkins.
- Programming languages PHP, HTML, CSS, JS.
- Frameworks : **Laravel**, basics of Vue JS (1 year) , Basics of Node.js

ACHIEVEMENTS:

- Winner of AI-based Hackathon at Codebuddy (2025).
- Google Kickstart Certified.
- Active competitive coder on CodeChef, LeetCode, and GeeksforGeeks.
- Contributor to Hacktoberfest (Open Source).
- TCS iON Cert-n-Edge Software Engineering Industrial Practice Certification (2018).
- Tech Blogger at [TheDevNerd](#)

EDUCATION:

2018 - 2020 | Institute of Management and Information Technology (IMIT) , Cuttack
Master in computer application - Software Engineering | CGPA: 9.03
